PROFILE

Final-year Bachelor of Software Engineering student with strong practical experience in web development and software engineering fundamentals. Interested in advanced software design, system development, and applied computing. Seeking admission to the **Master of Applied Science (MAsc) in Software Engineering** to deepen practical and analytical skills in modern software systems.

EDUCATION

Bachelor of Science (BSc) in Software Engineering

Orel State University, Orel, Russia

Expected graduation: July 2026

Relevant university coursework and projects:

- Algorithms and Data Structures – *Spelling check of text documents using approximate comparison with a sample*
 - Database Design – *Design and development of a database for keeping records of students attending sports clubs at the university*
 - Computer Architecture and Systems – *BIOS evolution of BIOS systems*
 - Professional Application Development – *Development of library classes for a hotel management system*
-

Backend Engineering (Non-degree program)

TS Academy – Online

Expected completion: May 2026

TECHNICAL SKILLS

Frontend & Web Technologies

- React, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS

Backend & Programming

- C#, Python (basic), Kotlin (basic), SQL

Frameworks & Tools

- ASP.NET MVC, Entity Framework Core, Tkinter, Matplotlib
- Git, GitHub, Vite, npm, VS Code, Visual Studio

Concepts

- MVC architecture
- REST API integration
- Component-based architecture
- Responsive design
- Cross-browser compatibility
- UI optimization
- Database management

PROFESSIONAL EXPERIENCE

Freelance Frontend Developer (Remote)

January 2024 – Present

- Updated existing codebases to modern development standards and improved application functionality.
- Developed responsive web applications for desktop and mobile platforms.
- Built and maintained databases and table structures for web applications.
- Worked with React, TypeScript, and modern frontend tooling to deliver user-focused interfaces.

Private English Language Tutor (Remote)

January 2023 – August 2025

- Created personalized lesson plans for learners with different backgrounds and goals.
 - Maintained records of assessments, tutoring activities, and learning progress.
 - Assessed students' learning needs and designed targeted instruction to close knowledge gaps.
 - Mentored students with emphasis on confidence, communication skills, and independent learning.
-

ACADEMIC & PRACTICAL PROJECTS

E-commerce Website with Admin Dashboard (ASP.NET MVC)

- Developed a full-stack web application for an online food store with product categories and blog section.
- Implemented authentication and authorization using ASP.NET Identity.
- Designed admin dashboard for managing products and content.
- Technologies: C#, ASP.NET MVC, Entity Framework Core, SQL Server.

Python Graph Plotting Application (GUI)

- Built a desktop application for plotting mathematical functions with user-defined intervals and precision.
 - Implemented input validation and error handling.
 - Technologies: Python, Tkinter, Matplotlib.
-

LANGUAGES

- English – Full professional proficiency
 - Russian – Limited working proficiency
 - French – Limited working proficiency
 - Igbo – Native
-
